SUPERVISORS,

HISTORIC OLD HOUSE

WILDER MANSION AT BOLTON, MASS.

Waint Old Structure, More Than Century Old, Was to Have Shel-After His Downfall.

Of the great country estates of Massachusetts there is none more famed in historical connection than the Wilder mansion on Wattoquottoc hill, in the township of Bolton. It was here that Napoleon was to have sought refuge had he decided to attempt to escape to this country; it was in the mansion house of this estate that Lafayette at one time made his headquarters, and years later the spot was selected as the future residence of President McKinley, but never so occupied. It has been the abode of several millionaires and the scene of in-numerable festivities of varied na-

A little more than ten years ago, says the Boston Herald, the Wilder mansion became the most talked of residence in New England. It was reported with many facts to substanti-ate the tale that President McKinley would become a resident of Bolton, and that he would occupy the Wilder mansion. At the time negotiations were completed to the extent of trans-ferring the property to the name of J. Wyman Jones, a brother-in-law of the late Marcus A. Hanna, Mr. Jones ad-mitted that he was acting in the interest of President McKinley. As in the earlier history of the famous estate, there was subsequently a change of plan, which robbed Massachusetts of the chance to acquire another world The Wilder mansion is a quaint old

structure, built over 100 years ago and several times remodeled. It stands on the west side of the hill road leading from Lancaster "old common" Bolton Centre, almost at the crown of the highest rise, although this road does not scale Wattoquottoc's height. Sampson Vryling Stoddard Wilder, the founder of the Wilder mansion, was born in Lancaster, May 20, 1780, and his family tree sprang from the Puritan stock which settled the place. The Wilders emigrated from England and came-to-Boston-in-1639. About the year 1800 Mr. Wilder, having met Tal-France to look after certain business interests obtained through his friendship special privileges from the French government. He made the acquaintance of many prominent men of the day, and preserved among his mementos are many personal letters which were written by them to him. He represented the United States on the occasion of the marriage of Emperor Napoleon, then in the height of his glory, to the Archduchess Marie

In 1823 Mr. Wilder returned to Bolton to settle down. The following year was made memorable by the coming of Infavette to America and the re-ception given the latter by Mg Wilder at the Bolton mansion was the event of the century for that community. The program was arranged by the host and the then mayor of Boston, the Hon. Josiah Quincy: the cloer.

It is a well established tradition

that the Wilder mansion was selected defeat at Waterloo, Napoleon delayed in taking advantage of the offer until too late. Passage had been engaged for him on a vessel that was to bring him to provide for his faithful friends until was compelled to give himself up as a prisoner of war

Be Yourself. Listen! The linnet sings its song, the rose gives out its fragrance; have you observed that the lark has re nounced its melody or the pink changed its array in order to become like these? Follow their example and you will come to understand that no one has a right to contend against you, or you to resist hlm. Man's duty to each of his fellows is to let him manifest himself through what is most individual in him, in order to realize the greatest utility for the whole. Show your own colors, sound your own note; it is precisely for this that you are here. Stand firm, do your duty; be yourself and be true—true, above all, in your thought, and in the expression you give it in word or action—Charles Wagner.

Animal Existence.

All the actions and movement of the animal world may be divided linto-three classes—involuntary, hisfinctive and rational. The former being common to every vital structure, both animal and vegetable; and the two latter, being possessed in various propor-tions, both by man and every class of the lower animals. Instinct is a natural propensity prior to experience, and independent of instruction, tending to self-preservation or the perpetuity of the race; while rational actions are always the result of instruc-tion or deliberation, directed to some end of which the animal is conscious and for the accomplishment of which he is capable of selecting and adapt ing appropriate means.

Of Course.

"What, then," asked the professor is the exact difference between logic and sophistry?"
"Well," replied the bright student,

"If you're engaged in a controversy, it's just the difference between your line of argument and the other fel-

AMERICAN PATRIOTISM FERVENT.

By Gov. Hughes, The same patriotic ardor fills the breast of American youth as when they rushed from field and factory and college in obedience to their coun try's summons. The wives and moth ers of America are as loving, as de voted, as ready to sacrifice and suf-

The men of the United States are as quick to respond to the call of duty, as keen, as resourceful, as vallant, as those of our herote past. They tro blessed with the memory of their fathers' labors! they are enriched with lessons of their zeal; they are inspired by the example of their pa

GOV. HUGHES. We are engrossed in the pursuits of peace Mind and nerve are strained to the humost in the warrier activities which promise opportunity for individual achievement.

But the American heart thrills at the sight of the flag, the American conscience points unwaveringly to the path of honor, the American sense of justice was never in its sway, and, united by a common ap preciation of the ideals of a free government, by a common perception of our instituting desting by a continuou recognition of the riches of our inheritance, the American people should, and we believe will, go steadily forward a happy, resourceful and triumphant people, enjoying in ever greater degree the blessings of liberty and union.

CENTRALIZATION NECESSITY, NOT CHOICE.

By Judge John Glbbons The States no longer are capable of grap pling with and solving the great interstate frust and transportation problems, not to mention the many grave international ques tions which now confront as as a people A the present time and under pregui tions it is untenable to maintain that the States are anything more than members of the nutloual boilt. Non dors it detract any

thing from their local sovereignty or importance to that they are members of the national body. The States must remain indestructible forever, and so far as i concerns their fiscal and prudential affairs and matter pertaining to health, morals and police, the States mus continue in the future as in the past to exercise soy ereign powers so long as those powers do not conflic with the national constitution.

Our destiny as a nation is onward and upward, and i would be dangerous and unwise to permit the States t-interfere in interstate matters or international affairs Hence the apprehension of certain alarmists to the offer

that the nation is usurping the powers of the States is without any real foundation, because the powers now assumed by the nation, althorto supposed to be reserved to the States, simply are an outgrowth of conditions which have arisen from circumstances beyond the contempla tion of either the States or the nation. Duties have been ast upon the untion arising from the exigencies of the

times. This does not mean asurpation of the rights en tional life, the progress of events, the trend of empire, Lofty statesmanship and fortultous circumstance placed us upon the crest of the flowing tide of expansion and and appart greatness. We must continue to drift di-ward and appart or walt for the ebblig tide to sloat backward and downward. We cannot remain inactive and stationary. There is no storping place, no station in the life of the nation or individual not intoked by progress or retrogression.

AMERICAN EDUCATIONAL TENDENCIES.

By E. E. Brown, Commissioner of Education,

While there is much in American educational history that adds of right to our hational pride, we must not overlook the fact that even now we are only at the beginning of things, with newsproblems before as and difficulties greater than, those we have sur-mounted. Our secondary schools must become better differentiated to meet the needs of our people, and more widely extended to meet the peeds of all. Their adjustments to schools those and below inner by made closer and more vital.

Our universities have only begun to deal with she probem of educating vast bodies of immature students in single institutions, and their problems of professional and graduate study are numerous and are pressing for apulsory education laws have been adopted and now

are in force in thirty six States. Such have now are supplemented with their natural and assessing accompaniamin, that is, with laws restricted the employment of, ehithers in their two, these the rests States, while in elegal other States in the 18 2nd labor flow unarorganized efforts are making to prove the operation of these laws and segure their adoption in States in we are not in force. Its truent schools and traunt officers and children's courts this movement is, in various parts of the country, receiving added reinforcement. In spite, however, of all these efforts our chool attendance still falls below that which we ought to have if we are to be a thoroughly educated people Modern education calls for schooling for those

markets. —The -natural resources of the country The matural resources of the country promise to exert even greater influence than the sale of American securities abroad. The fatter have suffered discredit, to some extent, under recent pressure. The intrinsic value of the products of the farmer, to which must be added those of the mines and oil fields, and their countries of the mines and oil fields, and their countries of the mines and oil fields, and their colossel aggregate at this time of the year is beyond the reach of financial distrust, above the power of Wall street.

Convention of Trust-Curbers. At Chicago 400 delegates appointed by State Governors met, under the ausplees of the National Civic Pederation, to discuss the curbing of trusts. President But-ler of Columbia university, who presided, made an address, in which be warned against prehature of Ill-considered measures for the regulation of public service corporations, lest they disturb "that faith which civilized man-has-in his fellows and upon which rests the whole enormous structure of our credit system." He add-ed that if this were destroyed there would be few corporations of any kind left to regulate. At the same time he admitted that the country was face to face with new economic conditions and abuses which must be checked. He thought that the Sherman anti-trust law commits the nation to a too extreme policy by exalting competition over co-operation. Many economists of national reputation took part in the discussions which followed or delivered set uddresses Bankers mer Judge Grosseup nired his favorite plan for a national corporation commission and Samuel Compers said that the trade was the proper accompaniment of rust. The majority favored some the trust. The majority favored some form of federal regulation of all corpora tions. Many of the delegates took the same position as that of President But-ler against the Sherman anti-trust law, for against the Sherman unti-trust law, it being the sense of the Jouvention that the law was more at fault than the trusts

The New York, New Hacon and Hart Railroad will now proceed rapid of the trial installation on the division between New York City and Stainford

The outcome of the trial of T. L. Ford chief counsel of the San Francisco Street Railway Company, who was indicted for bribing city supervisors, was a disagree-mem-of-the jury, which spood eight for ac-quittal and four for conviction. Another trial is already in progress. Linkled States district attorneys in va-

rious parts of the country have dructed by Attorney General Bonaparte of institute sults against a large number of railroad companies to recover penalties incurred by them for alleged violations of the salety appliance law.

Advance copies of the funticial state ient of the Rock Island Railroad show otal carnings of \$60,208,120, an increase expenses, the net carnings were \$10,1415.

Ohio road shows gross carnings for the past year of \$88,562221 an increase over the two previous years. The not year, \$27,302,830, a decrease of \$513,001 from 1906. Operating expenses increased \$5. The business of Hayana, Cuba, is par-

alyzed by one of the greatest stickes in her history, being emised by the walk-out of the engine drivers on the railway lines leading out of the city. Their grievnot American money. It has been almost impossible to move any trains, as the men employed to take the places of the strikrs are afraid to work, although protect-

cial results of the operation of Chicago's traction lines shows that the city's share of the net profits of the Chiengo City railway for the first six months ending July 31 were \$278,218. This is based upon the city's getting 55 per cent of the total profits. When the Union traction lines are brought into the city operation plan it is estimated that the city's share of the profits will be over \$1,000,000, Much disenssion has been caused by the

report of the Philodelphia Rapid Thansit Company for the last fiscal year, showing a denett of over \$344,000, while during the same period the company paid damage claims for accidents to the amount of \$1.217.586, or 7 per cent of the gross elpts. This does not include the of the legal staff in defending suits. Com-menting on these figures. MISCHIEF FLIES DO.

This Insect Is the Verlinble Angel

One by one the plagues of Egypt are being abolished by science. The frogs were abolished long ago by the drain tile. The fleas are checked by insect powder, and the darkness that could be felt has melted away before the arc light. The sixth plague still remains in full glory. The fly is always with The great Dr. Radeliffe used to declare that the three worst annoynnees of life were smoke, files and irrelevant questions. Humanity has hitherto accepted these with a patient shrug of the shoulders as among the inevitable.

At last the worm has turned. It is proceeding slowly to put on smoke sumers, and has declared a-war of extives which what hitherto ensily blunted purpose are supplied by sci ence. They are, first, that flies curry disease; second, that their very presence is a sign of dirt.

That the fly is frequently the angel of the pestilence has long been suspect ed, says Collier's in an important ar ticle, but its most vivid and impres sive demonstration was furnished by the disgraceful death rate from ty he many murders of official stubidity Spanish-American war. It was clear of experts, who investigated the situmeans of the spread of this dreaded disease was the hight of files from the excreta of the earliest cases to the food the typhold germs on their legs and

KIDNEY TROUBLES

The kidneys are essential organs for keeping the body free from impurities. If they should fall to work deathwould ensue in very short time. Inflammation or irritation caused by some feminine derangement may apread to some extent to the Kidneys and affect them, The cause can be so far removed by using Lydia E. Pinkham's Vegetable Compound that the trouble will disappear.

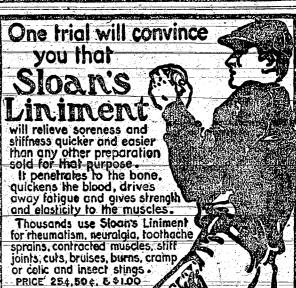

When a woman is troubled with pain or weight in loins, backache, swelling of the limbs or feet, swelling under the eyes, an uneasy, tired feeling in the region of the kidneys, she should lose no time in commencing treatment with ncing treatment with

Lydia E. Pinkham's Vegetable Compound It may be the means of saving her life. Read what this medicine did for Kate A. Rearn, 529 West 47th Street, New York, who writes:—Dear Mrs. Finkham:—"I owe a debt of gratitude to Lydia E. Pinkham: Vegetable Compound for it has saved my life. I suffered with Kidney trouble, irregularities and painful periods, and my-blood was fast turning to water. I used your medicine for some time and it has made me strong and well."

made me strong and well."
Lydia E. Plakham's Vegetable Compound made from native roots and kerbe cures Femile Complaints, such as Falling and bisplacements, and Organic Diseases. Dissolves and expels Tumers at an early stage. It strengthens and tones the Stomach. Cures Headache. General Debility and invigorates the whole system. For derangement of the Kidneys in either sex Lydia E. Pinkham's Vegetable Companind is excellent.

Mrs. Pinkham's Invitation to Women

Women suffering from any form of female illness are invited to write Mrs. Pinkham, at Lynn, Mass., for advice. It is free.

Crude thoughts as they fall from the Editorial Pen-Pleasant Evening

A column dedicated to Tired Mothers as they join the Home Circle at Evening Tide.

Saturday Evening Reveries.

The sacrifice that so many of our young men are making to secure a poin a store, is really amusing. In almost all parts of the country let ness, than to take an ordinary clerkany store-keeper proclaim that he has, or is likely to have, a vacancy, and he is forthwith over run with applications, We know of young men-work ing for from 'two hundred to three hundred dollars per annum, and boarding themselves, who can command, as mechanics, three times that sum. Why is it that good mechanic of almost every kind are so scarce and are commanding their own price while so many young men are turning their backs upon their father's calling, and lying in wait for opportuni ties to measure calico between dingy walls, fourteen hours a day, for a

Do not flatter yourself, young man, that your fortune is made, that you are a gentleman, when once you have Yardsticks & Co.'s counter. You have an exceedingly hard-road-to-travel to achieve anything like success You may just as well understand it first as last. Unless you have a large amount of energy, and are willing to work hard and long, and wait patient ly, and have some natural adaptation to the business, the chances are that you will fail. Don't take on any airs the first year. The most detestable sight imaginable is a youth with half an intellect, half developed ,puffed up with an exalted idea of his own importance because of his good clothes and six month's experience-in-a-sec ond rate retail shop.

merchants succeeds in making a fortune. Very many of them fail; and succeed by a lifetime of weary labor. No business is more confining. We right well the value of a little respite; and a little snuff of pure air, and the manufactured articles, like typewritpleasure of an occasional touch of the bright, warm sunshine on the pallid cheek. But, boys, if you-think-there is no other road to happiness, wealth and renown but to sell dry goods, try it. Let us assure you, however, that so long as there are so few learning to make boots and shoes and harness and hoes and pitchforks and brick walls, and people continue to need direction are better for building a fortune and establishing yourselves as useful, honored, and influential members of society. If you are established-in-any business, we counse you not to leave it. It is a question which requires consideration, and false considerations of ease or re spectability. You will succeed in nothing without continued effort; and you have ability and are willing to work to that end, you will be successful, and success will command re-

Starting in Life.

No young man who desires to suc eed in business has any time to lose in shuffling about in experimental clerkship; and after finishing his school education the sooner he makes choice of his business for life and sets himself at work to learn and become uccessfully established, the better. No young man can afford to make a mistake in his choice of occupation; he first choice should be the true one, For this reason we would say to a young man in regard to routine clerkby no means accept a place of that kind, not even if the salary is large; it may seem large at first, but there can be no compensation to a young man for the loss of time. Indeed, we are of the opinion that a young man, at the start, had better work for nothing, or even pay for the privilege of going into an establishment where he can learn a good busiship at any price.

One Swallow.

One swallow doesn't make a summer, but some of our young men should remember that too many swallows are certain to make a fal

Show us a boy who obeys, his pa ents, who has respect for age, who always has a friendly disposition, and who applies himself diligently to get wisdom and to do good toward other and if he is not respected and beloved then there is no such thing as truth in the world. Remember this, boys, and grow the and become useful men.

Wages and Trade.

Suppose we were to reduce the pay \$2,00 a week of all those who work for wages just his country. This might do something to help us compete for the markets of the world with other forion countries · But it would reduce the co-suming capacity at home by at least \$1.5(10,---000,000 annually, or more than three

times the sum of our export thade at present of purely manufactured goods-Yet even this reduction of wares would be scarcely more than an entering wedge. If it resulted in doubling

our manufactured exports it would accomplish all that could be expected mel their we would still be out at least And after we diave once begun this world competition, let us see what we are "up against." Japan is reported to-day to be duplicating American

ing machines, at a fraction of what they can be made for in this country, and so faithfully do they copy them. but the manufacturers themselves know the difference. larger than dimes in Japan, what

udahy Reduction Story Causes Tall of a General Decreas Reductions in the price of

general are likely to come in the nea

uture, according to opinions expressed by Chicago jobbers and ment packers, and aspired by predictions credited to Ed-vagd A. Cudahy of Omaha. There is, however, no general move just now to put lower prices into effect. Mr. Cudaby, it is reported in dispatches, said that his company had reduced prices 10 per cent. "As soon as the financial conditions be-come more sertled I look for further decome more seried 1 look for turner ac-clines in the price of live stock," said Michael Cudahy, president of the Cudahy company. "There is an abundant supply and reduced prices to the retailer and consumer will very probably follow. Re-celpts, which have slightly fallen off during the recent disturbance, will be all the heavier when the flurry is past. I think the Omnha report that a 10 per cent decrease had already been made is errone-ous. In fact, if it were so I think I as president would be aware of it. A. A. Sprague II. of Sprague, Warner & Co. held out some hope of a general cut is priges. "Everything is so high now tha it seems a safe prediction that prices wil " he said. "I look for cheape doodstuffs if there is any appreciable change in the present level of prices. Juat present however, quorations are fairly stable and I know of no general move-ment toward lower cost of living." "Whether foodstuffs are to go lower all depends, of course, on supply and maid," said Franklin MacVengh. many lines of inerchandise handled by us there has been a short supply. There is at present no general outlook for lower prices that I know of. Here and there, of course, there will be minor ductuations. Cereal products have gone up tremendously, and there is, some doubt who will be prices can be maintained. That

TWENTY FIVE MEN STRIKE AT MARE ISLAND YARD.

Protect Demand Great Increase in Wages at Critical Time-Boy Prank Ends in Electrocution Austrian in Duluth.

Repair work at the Mare Island navy ard, San Francisco, in preparation for he arrival of the Atlantic fleet, his been fleetnally tied up by a strike of twentyfive riveters. The strikers were at work on the transport Sheridan at the lime they walked out. As that vessel occupies the dry dock, the yard is unable to take additional work at the present time. Labor conditions on the Pacific coast are such that it is said to be almost impos-sible to fill places of the strikers. The men were receiving \$3392 in day, when their helpers received \$3,20 and the heat ers \$2.80 a day. The riveters demanded \$25 a hundred for one-inch keel rivets and \$12 a hundred for seven-eighth-inch plate rivets. At this rate they would make in excess of \$25 a day, out of which they would have to pay their helpers about 80 a day. According to advices to the Navy Department the men presented their demands and walked out, immediitely following the receipt of news Thu the President had definitely fixed the sail-ing date for the Atlantic fleet. Assist-ant Secretary Newberry felt that the men had taken unfair advantage of the depart-ment, masmuch as they had not given the lepartment an opportunity to consider the gravance. At the order are the degartment, the strikers were summind to the surface and upon their fallire to appear record was made that they

MAN DAISE NO CROP IN 1908. Porch Is Used to Enforce Demands

PEACE CONGRESS RECORD. Net Results of the International

Conference at the Hague.

The net results of the International
pence conference at The Hague, which extended from June 25 to Oct. 18; are, in the opinion of Gen. Horace Porter, a prominent member of the American dele-gation, far beyond expectations, instead of being a disappointment, as has been frequently reported in cable dispatches, Gen. Porter said they had done the work they were sent to do, namely r to estab-lish the principle of the inviolability of its the principle of the inviousity of private property at see as a rule of interdictional law. He says they secured for this the support of a large majority of the powers represented, although they fulled to win unanimous assent. Besides this, the conference has placed restrict tions upon the use of floating mines; has forbidden the bombardment of undefend-ed sen coast towns; has prohibited the levving of contributions by threats; has shielded the non-combatant in war time; has strengthened the provisions for relief of the wounded, and has taken precautions against a revival of privateering by insisting that converted merchant vessel he formally enrolled upon the haval list and commanded by a sinval officer. And, finally, just before adjournment, the plan of a permanent Court of Arbitration was agreed upon, with only a few of the small-er-nations dissenting, not-from the prin-ciple; but as to the hellied of conducting negetiations, holding that the judges should be appointed upon the basis equality of all nations. As to the collec-tion of debts by force of arms, the Porter resolution forbidding the employment of force until after arhitration should have oon refused, or after an award had been et at naught, was manimously accepted. Oil Trusts Spy Methods.

While hunting for your explanation of the big loans shown on the books of the Standard Oil Company for last year Government's Counsel Redlog brought to light the trust's system of spying known as the "statistical department." It was the purpose of this department to leap tab on all sales by ricals through an intricate spy system. It keeps a record of every barrel, earl or tank car load which ompatitors, and traces this oil to the market, with each charge for transportamarket, with each charge for transporta-tion and the final selling price noted. An-other device employed by the Standard is that of the dummy company, which masquerades as an independent concern-and is moved from the field to another, its business being to cut prices under real competitors of the Standard, in

Paris Acroplane Record.

Henry Farman, a Paris aeronaut, has ecceded in navigating the air on his breaking the record of 220 nieters, thus breaking the record of 220 nieters, held by Santos Dumont. The machine traveled at the speed of twenty-five miles an hour, and was brought to the earth with only slight damage. It employed a fifty horse-power motor. The start was made with wheel resting upon the ground, but when a speed of twenty miles an hour was reached by a slight elevation of the front horizontal-rudder-the-aeroplane-glided nto the air to the height of twelve meters; then, by adjusting the rudder, that height was maintained throughout the light. Farman says he is con he can'fly a mile slightest difficulty. or more without the

The proportion of profit is usually greater where small numbers of stock handled than otherwise. where the small farmer comes in.

Barley, as a feed for live stock is much commoner in European countries than it is in the United States. In this country it is confined more largely to States of the Pacific slope. Byproducts left from the breweries are isually used as stock-feed—Barley-is a crop that can be raised in a great many different climates and is surer of maturing a crop than some other of

New Variety of Red Clover. A recent Government bulletin glassecounts of new kinds of clover obtain-The variety that has M from Russia. been most promising is other called Orel. One grept advantage of this type is that it is fairless. Every reader, who has examined either red or manmoth clover must have enothed The abundance of hairs, so-chilled, on the stem, and the midrib and skeleton of the leaf. It is this hair or fuzz. hair furnishes the very best opportu-press for againstitution of the rungi which are the cause of the heating of dover hay. One of the merits of alsike it be engoth like the Orel clover. In most places where it has been tested this vuriety yields much better than any of the native varieties, and where it has falled it has been in comparison with varieties of similar orlgin. It has much more leaf growth, but is about two weeks later in along after the mammoth clover; so They much-later, in fact, that it is not easy to procure seed from the second crop except north of latitude-43. It is no recommended as a substitute for the common red or mammoth, but as supplementary to either particularly in sections north and west of the pres-

ent limit of clever growing. At the Manitoba Station an experi ment was made as to the gains by tur confined in pens, as compared with those that ran at large. Those in pens were given all they would ent elean of a mixture of wheat, outs and barley, 2:1:1. In the morning the grain was fed the turkeys which were not but in the evening it was fed whole.
It was noted that the furkeys were apparently more roud of outs than of the other grains, so toward the end of the fattening period the proportion of this was fed the turkeys which were not confined in addition to the food which they could gather. The five turkeys in weighed on an average 655 pounds each at the beginning of the test. During the forty-two days of the feeding period the average gain was 4.05 bounds, 6 bounds of grain eaten per bound of gain. The turkeys at large also weighed at the beginning of the test 6.55 pounds each and made an average gain of 1.85 pounds. On both cases the greatest gains were made during the first three weeks of the period. It is stated that

sheank 5 per cent less than those run

Fungus Growth on Grains. Smut is annoying to farmers, as it to cense using the seed from his crop. which may be of some valuable variety. So damaging has been smut on all kinds of grain that the United States Agricultural Department has Issued several special builetins on the subject country is very large, and yet the matter has received but comparatively litthe attention. Smut is caused by min nto parasitic fungi, the spores, or seed-Hice bodies, which form the black, dusty mass that takes the place of the kernels, or the entire head. These spores are very minute, and are castly blown about, often achiering to the such kernels sprout the spores also bead as soon as formed, and there do velop a mass of spores instead of ker-This black mass is so well known as to be recognized by every farmer

Ment us Chick Food. In recent report of experiments in feeding chicks, the Rhode Island Ex-periment Station says;

The use of the proper proportion of animal food will pay a handsome profit through decreased mortality and in-creased weight of the chicks. In feed-ug, bear in mind that chicks in a state of nature spend practically all of their working hours in search of food, and that they do not fill their crops in ten minutes every two hours. Feeding should be, as far as the time of the attendant renders profitable, a contervals and given each time tinnous process, but by no means a

continuous_gorge. The experiment which led-up to this conclusion was with an incubator hatch of 219 chlows. These were separated into lots of about lifty each and placed in similar brooders; For thirty days all conditions were keptallke except rations. Pen A was fed a balance ration of grains, meats and the deaths were 185 per cent, of which 75 per cent had bowel trouble. Pen C was fed on grain alone, all animal food and all green food being omitted from the ration; the deaths were 32.7 per cent, of which 955 per cent showed digestive trouble. In Pen D all grain food Was omitted; the deaths of chicks were 62.7 per cents of which 85.8 per cent showed bowel trouble All the living chicks were weighed at the close of the test, and Pen A showed the greatest anverage weights for all

How to Exterminate Hen Mites Some years ago our henhouse was mally infested with red lice. I will my way of getting rld of them for I think it is a good one; at least it proved successful. We began by pull ing out the old roost which was whitewashed the walls and nests: We poured some kerosene on the cracks around the nests. The kerosene will the leaf. It is this hair or fuzz that run along the cracks and kill all the renders red and mannoth clover; so flee it gets on. The floor was covered exceedingly dusty, and we suspect it is with said. We then put up a haug-this that-eauses it to turn black and ling roost by taking some half and mallspoil so readily in bad weather. The hig one end to the ceiling and fastened roost to the other end with a wire After you have the roost up, dust the to destroy the This hanging dickens with powder lice that are on them. roost is very important. Have it far mough away from the walls so that the chickens, when on it, will not touch the walls, and do not let any chickens roost on the nest or anywhere else. The red lice do not breed on the chickvos, as the large gray of white like do They lay their eggs in the cracks around the roost and nests. Most of them leave the chickens in the morn ing and go on them again at night. It this way you can quickly get rid of al the red lice. Even if you only make the roost you can get rid of the lice for they cannot get on the chickens at But it will take two_or_three months before they will all starve for they live on one another. If the coop is full of red lice the chickens not sickly Do not set any hens in where there are red lice. Move them after dark to a nest where you wish them to set. They generally so well this way if you keep, the nest dark for a day or two. The large gray or white lice never leave the

Dusting with powder is about ass good as mything to kill them.tilda M. Sharbaugh. Soil, Mulching.

The soil is protected by mulching, not only because mulching assists in re-

taining moisture by preventing evapo ration, but also because the covering supplies moisture in dry seasons by capillary aftraction of the soil, which gradually brings up moisture at a time when it is most needed There outleting-opinions-and-theoric being regarding the effects of inniching, at the statement that a watch was never things work well. though many of the difficulties may be traced to the materials used for the purpose. In its consideration some of the leading horticulfurists, maintai that dry earth is the proper material of use, it being cherp and more easily applied. If the material used, be mapenned turkeys when dressed nure, the labor, of spreading and reoving it is often greater than the olug at large and that they were plump value of the erop. A couling two inch er and were in every way more inviting in appearance. es upon one acre amounts to about 200 londs, which may cost from \$25 to \$50 in labor alone, and this sum is still further increased if the manure is not only causes loss, but compels one worked into the soil, while coarser material, such as straw, leaves and corn-stalks; must be applied and afterward ontirely removed in order to allow of emitivation. It is claimed in favor of dry earth that it is an excellent nonnductor and holds between its partiloss of grain from smut in this cles a large volume of air, which not only prevents an attack of frost to a certain extent, but retards loss of moisture and heat. Every rain how. ever, compacts the covering of earth forces out the air and lessens the utility of the earth as a mulch. To avoid this, the farmer must resort to frequent cultivation by stirring up the soil. It is due to its service as a mulch kernel before it is planted, and when that'dry earth is capable of mitigating the effects of drought by being fro comfinate and send delicate throads quently loosened by a cultivator, and into the young seedlings. These threads for a long time this fact, in connection follow the growth of the plant, fill the with cultivation, was not properly con sidered: but the value of cultivation is due to the entrance of air into the soil which is not only of itself a mulch but assists in hastening chemical ac

tion and the preparation of plant food

What-Did-Ho-See?

The professor of English in one of being very absent-minded. It was his custom to call the roll each morning before the lecture. One morning, after calling a name to which there was no response, he looked up, and, peering over-his-spectacles, he asked, sharply: "Who is the absent boy in the vacant chair I see before me?

When you meet a man who has mor a menace to the grain crop of next growing plants or tood and moisture. er in the hank it's a pretty-sure sign

THE PASSING AND PERMANENT.

By Henry F. Cope. "Prove all things; hold which is good." 1 Thess. v., 21.

When the walls are being rebuilt I is easy to imagine that the founda tions are being destroyed. Old creeds pass away, but truth remains; if they were true in their day they do but give place to the larger truth of the new day. We need to distinguish between the turmoil attendant to the process of building and the beauty of the new temple that arises.

The old folks hear the new truths and ask where are the foundations gone? The young hear the discussion between the old and the new and ask is there anything settled, any worth believing? What are the permanent elements in religion on which the life build while the things that are but temporary are adjusting them

It would be the height of folly to issert that there is no change. say that we must believe precisely the same things as our fathers believed. To do so would be to be false to our fathers, for they refused to necept the traditions of their eiders. The land-

Truth is ever changing; our vision is ever enlarging. The read remains but the traveler moves on. With the living every day has some new light. Creeds are crystallized statements of truth; truth is vital and cannot bo contained in unchanging forms. Credulity blindly accepts yesterday's ple ture of truth; fulth, with open eyes seeks to-day's truth itself...

Skepticism-is-must-less-sinful than credulity. The sloth of the man who will not examine things, will not prove them, who prefers to buy his garments of truth ready made, results in what s-worse-than unbelief, and that is blind belief in the fulse. It is a religious duty to question every teaching, to prove all things,

How may we find those things that are cortain? How may we discover the truth for one day, the truth upon which we may build? Surely there are some may we find that trith which belongs strain or pressure that would cause the to-our day and in which we may have same amount of material in any other the confidence that our fathers had in their truth?

The test of the vital truths is a frame of the bicycle, in which form the practical one. Only those truths are ness of living in all its wide sween. Reforming a Tramp

(Copyright, by Joseph B. Bowles.)

"Ho. Ho. Hillo! Hello, there! Any Mrs. Parke Austin was in her dress

ing room getting ready for church when this boisterous greeting fell upon her ears. "Mornin', ma'am;" pulling at

acrap of a cap which set jauntily upon a crop of black curly hair. "Have you got a bit of work you could give me, ma'am, for a bit of breakfast?" Now she spoke quickly. "It's Sunday, man. Haven't you any respect for the day?"

"Oh, yes, ma'am; but you see, the day has no respect for me, ma'am.

A fellow gets hungry on Sunday just the same's any other day, and the Good Book says if a man won't work, neither shall he eat." -

There was such an irresistible air of drollery in this absurd wresting of Scripture, that Mrs. Austin laughed in spite of herself.
"I can give you a breakfast," she

said, with a rueful fear of being late at church, "but I have, no Sunday

work for you."
"Then I'll come around to morrow and do Monday's work for Sunday

She watched him as he ate, and noted with some surprise that he handled his napkin and the silver f he had always been accustomed to them, and a thoughtful, preoccupied expression came over his face, quite replacing the saucy, merry look he had worn at first.

"I'll be on hand to-morrow, ma'am bright and early," he said, as he left the door, that thoughtful look still on his face, "and give you honest Monday work for Sunday food—the best I've tasted in years, ma'am." He touched his old cap again, and was gone, and Mrs. Austin returned to her toilet with a queer feeling that she had entertained an angel, or something peculiar, unawares.

merry tramp was true to his promise, and with a scythe Monday morning was making war on some come are mome.
